SCAFFOLDING

All Systems Swing Stage

Swing stage scaffolds take men, tools and materials up to the ideal working height to get the job done correctly and efficiently. They are the ideal working platform in almost every area of construction and maintenance involving a vast range of trades because of their versatility. All Systems modular swing stage scaffolding can be designed in any configuration up to 16mts in length.

BENEFITS

- Time saving & cost effective alternative to system scaffolding
- Quick and easy to transport, install, relocate and dismantle
- Unlimited working height.

MODULAR SWING STAGE SYSTEM

- Aluminium 'I Beam' Monorail swing stage system
- One man cage – great for access into tight areas
- Corner sections to suit almost every area you encounter.
